Simply close the door

THE DOOR THAT LOCKS ITSELF!

Ferco’s “Simply Secure” 3-deadbolt locking system activates automatically.

By simply closing the door the upper and lower ¾” (20mm) latches will instantly engage and become 2 additional deadbolts for maximum security.

Your closed door is always protected against warping.

The door is locked when you simply turn the knob or key, engaging the 1” central deadbolt.

Advantages:

- The latch bolts, after closing become two additional deadbolts
- The door is prevented from warping since it is always locked
- North American locking function; no need to lift handle in order to engage the locking system
- Proven European technology
- Straightforward, no confusion
- Ease of operation; minimal effort required to close, lock, and secure the door (convenient for children, an elderly person, an individual with special needs)
- Clear, visual confirmation of the door being locked/unlocked; peace of mind slam shut multi-point locking system
- 90 degree turn deadbolt operation
- Available for standard height and 8 foot doors
- Short high grade 16 mm stainless steel faceplate with radius ends, for a clean door edge appearance and weather resistance

OUR MULTI-LOCK IS AVAILABLE WITH DIFFERENT HANDLESETS IN A VARIETY OF FINISHES
