1. This report does not constitute certification of the test product. The reported test results refer only to the specimen tested. No representation is made that other samples of similar design will feature like performance.
2. This report was prepared for the consideration of the addressee only. It shall not be used by any other party without the written consent of CAN-BEST.
3. This report may not be reproduced or quoted in partial form without the approval of CAN-BEST.

1. INTRODUCTION

Canadian Building Envelope Science and Technology (CAN-BEST) was retained by Vista Patio Doors Inc. to test one Sliding Glass Door. Testing was conducted in accordance with the performance requirements outlined in AAMA/WDMA/CSA101/I.S.2/A440-22 'North American Fenestration Standard / Specification for Windows, Doors, and Skylights' and its Canadian Supplement CSA A440 S1-19. Where applicable, testing was carried out in accordance with the corresponding ASTM standard test method.

This report covers tests carried out on one specimen of specific dimensions. Product performance is affected by variations in its dimensions, assembly details and installation method. The reader is advised to ensure product conformity with all the details of the test sample described in the following section.

No conclusions regarding glass structural performance may be drawn from the reported results.

2. SAMPLE DESCRIPTION

Designation: "Rimini"
Type: Vinyl Sliding Glass Door 2190 mm wide by 2000 mm high (86.22 in by 78.74 in)
Sampling: Sampling of the test specimen was carried out by the Client.
Specimen Details: Details of specimen construction and installation, as provided by the client and verified by CAN-BEST, are provided in the following drawings:
Drawings:

Description Pages:	2 pages
Vertical and horizontal sections	2 pages
Bill of Materials	1 page
Die Drawings	9 pages

Copy of the above drawing(s), stamped "Canadian Building Envelope Science and Technology", is enclosed with this report.

3. TEST RESULTS

Detailed test results are presented in Tables (1.1) and (1.2) for the Gateway and Optional Performance requirements respectively.

Notes:

- This report does not constitute certification of this product, which may only be granted by an Accredited Certification Agency.*
- The reported results were secured by using the designated test methods and they (DO) indicate compliance with the performance requirements of the referenced publication.*
- The product tested is detailed in drawings, which were supplied by the manufacturer and annexed to this report. Any other descriptions were supplied verbally by the manufacturer. The general descriptions in this report are for reference only.*
